

An aerial photograph of a multi-lane highway interchange. A central elevated roadway runs vertically, with several lanes of traffic. To the left, a curved ramp leads to a smaller road. A small pond is situated in a grassy area to the left of the main road. The surrounding landscape is filled with dense green trees and some residential or commercial buildings in the distance.

I-95 & SR 896

INTERCHANGE PROJECT

Project Status/Ongoing Work

January, 2026
